## INTRODUCTORY

**I**N PRESENTING this Volume of the City Directory, it is but fitting that we should offer some remarks regarding the same. The contents of this book are the results of several months of labor in name taking, using every precaution and search to get correct names, addresses, etc.

Allow us to make the following suggestions: First, as to the similarity of names which, in sound, are the same, but often spelled Read, Reid, Reed, Reade, Reide, etc. In looking for names, use judgment in the search and ascertain whether it may not be spelled differently from your idea of it, and go through the list making sure if the name you are looking for is given. We have known people looking for "Smith" thrown down the book in disgust when, on investigation, the name sought for proved to be "Smythe".

In conclusion, we wish to thank our many patrons for the generous support they have given us, and trust that the result of our efforts will meet with their approval and appreciation.

NOTICE.—We have used every precaution to issue a valuable and accurate work. While errors may be found, such however, are unavoidable in a work of this kind, and no responsibility is assumed by any one for mistakes occurring as a result of these errors.

Fractions after number indicate the floor—½ the second, 1-3 the third, etc  
The word street is understood

To find a name you must know how to spell it

There being no rule for spelling proper names we would suggest that you  
look for it under several headings

A directory is simply to give a person's name and address. The occupa-  
tion or business is to distinguish persons of the same name apart, anything else  
is advertising.

Name in parenthesis ( ) is wife's name.

The street directory is arranged alphabetically by numbers. It shows the  
number of each building and the name of the firm or the head of the family  
residing therein.

Names appearing in CAPITALS are patrons of this directory.
